Last Revision Date: April 7, 2010

You will solve algebraic equations. Write the solutions as comma separated list, In the case of repeted solution write each solution only once!

Jeopardy Game

Solution

## A

Solve the equation in the set of real numbers.

$$
x+1=0
$$

- Write the solution into the field.
- If there is no solution, write the word empty.
$\square$

## A

Solve the equation in the set of real numbers.

$$
2 x-3=0
$$

- Write the solution into the field.
- If there is no solution, write the word empty.
$\square$

## A

Solve the equation in the set of real numbers.

$$
5 x+15=0
$$

- Write the solution into the field.
- If there is no solution, write the word empty.
$\square$

## A

Solve the equation in the set of real numbers.

$$
7 x+13=0
$$

- Write the solution into the field.
- If there is no solution, write the word empty.
$\square$

## A

Solve the equation in the set of real numbers.

$$
3 x+1=0
$$

- Write the solution into the field.
- If there is no solution, write the word empty.
$\square$

## A

Solve the equation in the set of real numbers.

$$
2 x+7=0
$$

- Write the solution into the field.
- If there is no solution, write the word empty.
$\square$

## A

Solve the equation in the set of real numbers.

$$
5 x-6=0
$$

- Write the solution into the field.
- If there is no solution, write the word empty.
$\square$

## A

Solve the equation in the set of real numbers.

$$
7 x-13=0
$$

- Write the solution into the field.
- If there is no solution, write the word empty.
$\square$

Solve the equation in the set of real numbers.

$$
x^{2}+x=0
$$

- Write the solution into the field.
- If there is no solution, write the word empty.
$\square$

Solve the equation in the set of real numbers.

$$
x^{2}-9=0
$$

- Write the solution into the field.
- If there is no solution, write the word empty.
$\square$

Solve the equation in the set of real numbers.

$$
x^{2}-7=0
$$

- Write the solution into the field.
- If there is no solution, write the word empty.
$\square$

Solve the equation in the set of real numbers.

$$
x^{2}+4 x=0
$$

- Write the solution into the field.
- If there is no solution, write the word empty.
$\square$

Solve the equation in the set of real numbers.

$$
x^{2}-x=0
$$

- Write the solution into the field.
- If there is no solution, write the word empty.
$\square$

Solve the equation in the set of real numbers.

$$
x^{2}+9=0
$$

- Write the solution into the field.
- If there is no solution, write the word empty.
$\square$

## B

Solve the equation in the set of real numbers.

$$
x^{2}=0
$$

- Write the solution into the field.
- If there is no solution, write the word empty.
$\square$

Solve the equation in the set of real numbers.

$$
x^{2}-4 x=0
$$

- Write the solution into the field.
- If there is no solution, write the word empty.
$\square$

## C

Solve the equation in the set of real numbers.

$$
x^{2}+x+1=0
$$

- Write the solution into the field.
- If there is no solution, write the word empty.
$\square$

## C

Solve the equation in the set of real numbers.

$$
x^{2}-6 x+9=0
$$

- Write the solution into the field.
- If there is no solution, write the word empty.
$\square$

Solve the equation in the set of real numbers.

$$
x^{2}-7 x+6=0
$$

- Write the solution into the field.
- If there is no solution, write the word empty.
$\square$

## C

Solve the equation in the set of real numbers.

$$
x^{2}+4 x+4=0
$$

- Write the solution into the field.
- If there is no solution, write the word empty.
$\square$

## C

Solve the equation in the set of real numbers.

$$
x^{2}-3 x+2=0
$$

- Write the solution into the field.
- If there is no solution, write the word empty.
$\square$

## C

Solve the equation in the set of real numbers.

$$
x^{2}+2 x+9=0
$$

- Write the solution into the field.
- If there is no solution, write the word empty.
$\square$

## C

Solve the equation in the set of real numbers.

$$
x^{2}-5 x+6=0
$$

- Write the solution into the field.
- If there is no solution, write the word empty.
$\square$

## C

Solve the equation in the set of real numbers.

$$
x^{2}+4 x-21=0
$$

- Write the solution into the field.
- If there is no solution, write the word empty.
$\square$

## D

Solve the equation in the set of real numbers.

$$
x^{8}-2=0
$$

- Write the solution into the field.
- If there is no solution, write the word empty.
$\square$

## D

Solve the equation in the set of real numbers.

$$
x^{3}-2 x=0
$$

- Write the solution into the field.
- If there is no solution, write the word empty.
$\square$

## D

Solve the equation in the set of real numbers.

$$
x^{4}-1=0
$$

- Write the solution into the field.
- If there is no solution, write the word empty.
$\square$

## D

Solve the equation in the set of real numbers.

$$
x^{3}-8=0
$$

- Write the solution into the field.
- If there is no solution, write the word empty.
$\square$

## D

Solve the equation in the set of real numbers.

$$
x^{5}-x^{3}=0
$$

- Write the solution into the field.
- If there is no solution, write the word empty.
$\square$

## D

Solve the equation in the set of real numbers.

$$
x^{6}-x^{5}=0
$$

- Write the solution into the field.
- If there is no solution, write the word empty.
$\square$

## D

Solve the equation in the set of real numbers.

$$
x^{3}+2 x^{2}+x=0
$$

- Write the solution into the field.
- If there is no solution, write the word empty.
$\square$

## D

Solve the equation in the set of real numbers.

$$
x^{3}+4 x^{2}+5 x=0
$$

- Write the solution into the field.
- If there is no solution, write the word empty.
$\square$

Évariste Galois (1811-1832) was a French mathematician born in Bourg-la-Reine. He died in a duel at the age of twenty.

Niels Henrik Abel (1802-1829), Norwegian mathematician, was born in Nedstrand. In early April 1829 he obtained a position in Berlin, but the letter bringing the offer did not reach Norway until two days after Abel's death from tuberculosis.

Both mathematicians proved the impossibility of solving the 5 -degree polynomial equation by radicals.
